» Key Features

3 hot-swappable batteries that can provide sufficient power, and the ergonomic side-facing design ease the use for nurses with different height. Compared to the LiFePO4 battery of the traditional nursing cart, the batteries installed on the POCm have better design by reducing more than 5 kilograms of weight. The battery docking station can perform fast charging, taking only 3.5 hours from 0 to 100%.

● Lightweight Design

Traditionally, the battery of working station is bulky and occupies space. The hot-swappable batteries makes POCm series an ideal medical cart computer for decreasing the total weight up to 5 kg.

LiFePO4 6.5kg! **V.S** **3 pcs Lithium-ion 1.38kg** **5 kg reduction**

● Highly Integration

POCm series product is a highly integrated PPC. When building a mobile working station, the easy installation steps prevent you from facing the trouble of integrating different components and messy cabling.

● Cost Effective

The typical price range of nursing cart battery is more than USD 600 (after service included). Our anti-bacteria battery saves more than USD 400 cost. Charging dock design meets the need of medical context and relieves the waste of time and efforts going back and forth between nursing station and ward.
